# Urban green infrastructure

Urban agriculture

Green walls

Urban woodlands

Suburban street trees

City street trees

Green roofs

Sensitive urban design

Parks, gardens & golf courses

# What is Green Infrastructure?

- Green infrastructure is a network of multifunctional green space, urban and rural, which is capable of delivering a wide range of environmental and quality of life benefits for local communities.
- Green infrastructure can include parks, open spaces, playing fields, woodlands, street trees and private gardens. It can also include watersheds and green roofs and walls.
